

Health and Safety

Our team of experienced occupational health and safety consultants – including Certified Safety and Industrial Hygiene Professionals – helps clients to reduce workplace injuries and meet compliance and strategic business goals.

We develop and implement proactive safety management solutions and strategies that:

- Assess and manage employee health and safety risks
- Increase environmental, health, and safety awareness
- Decrease accident and injury rates
- Increase productivity and save costs
- Educate employees about their company's EHS priorities

How we help

For over 25 years our team has been delivering a full range of health and safety services – industrial and occupational ergonomics, employee chemical and hazard exposure assessments and monitoring, health and safety program development and training, worksite and task evaluations, supplemental staff support and more – to companies of all sizes, in all industries, around the globe.

We help clients develop proactive safety management solutions and strategies that improve safety performance, reduce risks, save costs and help them fulfill their Corporate Social Responsibility commitment to provide employees with a safe workplace.

Our team of highly-skilled health, safety and industrial hygiene consultants is available to provide on-site support, in a full or part-time capacity, to supplement existing staff or lead delivery of new health and safety initiatives – without investing in permanent headcount.
