

Immersive Technology Solutions

Transforming business. Delivering results.

What are Immersive Technology Solutions?

Technology is changing the way BSI delivers many of its audit, training and consulting services. This allows us to connect to our clients in new and effective ways. BSI's Immersive Technology Solutions (ITS) suite allows our subject matter experts (SMEs) to work with you remotely and to continually deliver value to your organization.

Maximizing the benefits of technology, we can support your expectations, wherever you are in the world. Immersive Technology Solutions enable us to deliver our services with the same levels of excellence across the globe.

Our technologies

Level 1: Live web streaming technology

Live streaming technology such as MS Teams, Webex and Adobe Connect to support:

- Document, record and procedure review
- Live interviews with your teams
- Connected learning live - our online training service

Secure sharing platforms may also be used to transfer documentation.

Level 2: Live streaming paired with mobile technology

Video applications on smart devices (phones and tablets) immerse our teams.

This technology enables virtual site tours. It allows us to observe the implementation of processes and activities in real time.

Level 3: Live streaming paired with smartglass technology

Fully immerse in the audit by using hands-free technology such as smartglasses and video headsets.

We provide immersive technology equipment in advance of the audit for your teams to use in action.

Live feeds communicate data to our augmented reality platform for verification by our experts.

Level 4: Drone and satellite aerial imaging and analytics

As part of our Immersive Technology Solutions, we are currently using drones, unmanned aerial vehicles (UAVs) or satellite imagery to bring our clients a safe, cost effective experience that brings superior levels of analytics, planning and lifetime digital remediation of corrective issues.

Immersive technology is changing business

Combining BSI's longstanding auditing and consulting capabilities with its heritage as a global leader in initiating and shaping the world's most widely used ISO standards, Immersive Technology Solutions provide a seamless full-service experience.
